

Slurry Dry Super Absorbent Polymer

50 lb. of Slurry Dry treats 900 to 2700 gallons of slurry depending on water content.

Benefits:

- Saves time by making clean up fast and easier
- Convenient - captures run-off as it is created
- Easier than using a vacuum system - just shovel and dump
- Meets guidelines for local, state and federal agencies
- Helps avoid long-term liabilities
- Eliminates staining and clean-up of surrounding area
- Protects environment from harmful run-off

Item
Slurry Dry - 20 lb Box
Slurry Dry - 50 lb Box

Slurry Dry gives contractors a convenient way to contain water/slurry run-off on the job site, saving valuable time and helping to avoid costly clean up costs. Simply pour the super absorbant compound powder in the flow path of water and slurry to prevent it from reaching stormwater drains, and other areas where it may cause stains or other damage. The compound absorbs 1,000 times its weight in water, converting it to a solid that can easily gathered and disposed of as a non-hazardous waste.
